

CDMS / Agrian input verification

Effectively managing
CDMS / Agrian programs
from start to finish

The accuracy of information on CDMS and Agrian are vitally important to the sale and use of agricultural products. However it can be a challenge to thoroughly check the inputs CDMS and Agrian have made in an economical and efficient manner. TSG Consulting's team of regulatory and scientific professionals can help you ensure that the CDMS and Agrian databases accurately reflect the approved labeling for your products.

Some of the advantages and added value we bring to our clients include:

Assisting with both new product inputs and verifying amended label information

Verifying state registration status for each product

Ensuring that the base documents used for input are the most up-to-date versions

Acting as either an extension of your internal regulatory team during busy periods or providing the peace of mind that comes with allowing us to manage your CDMS / Agrian programs from start to finish
