

HSE CRD Forum: GB Human Health Regulatory Round Table

25 November 2024, 12-5pm, Cedar Court Hotel Harrogate

CRD has asked that specific questions delegates want to address be provided to them in October, well in advance of the meeting. **Email your questions to bd@tsgconsulting.com** by 21 October.

Suggested topics are indicated below.

Please formulate a specific question, either connected with one of the suggestions below or one of your own.

Residues, metabolites and dietary risk assessment

- Updates to UK consumer risk assessment models or future planned GB specific guidance
- Cumulative risk assessment
- Divergence from the EU system
- Common mistakes made during submissions
- Evaluation of secondary metabolites for microbial dossiers -
- Consideration of post-Brexit 2020 EU documents in GB assessments (e.g. draft RARs/EFSA Conclusions etc.)
- Storage stability studies and setting a stability period
- Specific data on non-target crops expected in GB when a crop is not considered melliferous
- TDMs following recent EFSA conclusions on triazoles
- GB extrapolation guidance 2024

Use and acceptability of toxicology studies

- Submission of older style, usually in vivo studies or in vitro studies to cover sensitisation and DA
- The use of BMD modelling and the application of fTWA from a toxicology point of view

Non-dietary risk assessment

- Drone / precision application exposure assessments
- Acceptance on the use of BREAM II and BROWES data
- Developments in seed treatment assessments (inclu. Acute assessment for substances assigned AAOELs and new model development)
- Updates to armature use guidance
- Updates to bystander exposure from protected uses
